Siemens Internal Talent Acquisition Team

Siemens Türkiye

Dear Hiring Team,

I am writing to express my interest in the long-term internship opportunity at Siemens. As a Computer Engineering student with hands-on experience in .NET development, AI integrations, and IoT systems, I am eager to bring my engineering mindset, problem-solving skills, and passion for innovation to Siemens' technology teams.

During my internship at **Innova Bilişim Çözümleri**, I developed real-world solutions using **.NET Core MVC**, built an **AI-supported document validation engine** with Gemini API, and designed modules that generated natural-language compliance reports for XML-based e-documents. I worked with **layered architecture, service-based structures, Dependency Injection, QuestPDF, ClosedXML**, and gained practical experience building scalable systems aligned with enterprise needs.

Beyond software development, I also delivered complete projects, such as an **AI-powered barber appointment system** and an **IoT smart wristband** that performs real-time health monitoring using ESP8266 and sensor data analytics. These experiences strengthened my ability to design reliable systems, work with data, and turn abstract requirements into working products.

I am particularly drawn to Siemens because of its leadership in industrial digitalization, its long-term vision for data-driven technologies, and its culture of engineering excellence. I believe I can contribute effectively while also learning from highly skilled teams working on impactful global products.

I would welcome the opportunity to bring my technical skills, adaptability, and enthusiasm to Siemens. Thank you for considering my application. I look forward to the possibility of contributing to your team.

Sincerely,
Alper Zeybek
